

Diebold Security
**COMPREHENSIVE SECURITY SERVICES
FOR EVERY ASPECT OF YOUR BUSINESS**

WORLD-CLASS SERVICE DELIVERED BY A SINGLE TRUSTED PARTNER

As a single source for all of your security needs, we are dedicated to providing you the most innovative security solutions and pairing them with our industry-leading monitoring and managed services. Benefit from Diebold's extensive reach and powerful resources and enjoy the confidence that comes from partnering with one of the nation's premier security services providers.

AWARD-WINNING MONITORING

Diebold is an award-winning enterprise security monitoring partner, delivering responsive, reliable, flexible solutions. Our Monitoring Center is UL, ULC, UL2050 and CSAA Five Diamond certified and is the only monitoring center twice honored with Central Station of the Year by the Central Station Alarm Association (CSAA). We offer a comprehensive portfolio of monitoring and managed solutions to help you enhance life safety and maximize your investment in security technology.

For more than 150 years, the Diebold name has been synonymous with security and innovation. We work with you to create the optimal solution for your security needs. And we pair that solution with the world-class services you need to help you mitigate risk and improve your operations.

Diebold embraces a services-driven approach to security to make your environments more secure and more efficient. Focused on more than devices and components, Diebold works with you to pair your solutions with the single-source security services you need to make them work for you. Leverage our comprehensive array of scalable, customizable services to enhance and improve your security operations.

Monitoring Services

Diebold offers a full spectrum of monitoring services from our UL, ULC, UL2050 and CSAA Five Diamond certified monitoring center. Customize services to match your location-by-location needs from coast to coast.

- Arm and disarm supervision
- Arm and disarm logging
- ATM skimming alert monitoring
- Disaster recovery monitoring
- Hold-up and duress monitoring
- Video alarm verification
- Custom exception reports

Diebold SecureStat® – Online Services

SecureStat® revolutionizes the way you interact with your security. Integrating with your equipment and available on any smart device, anytime, anywhere, SecureStat makes comprehensive security management a reality.

- **SecureStat Access:** Determine how and when facilities are accessed by modifying or deleting cardholders, remotely locking/unlocking doors and managing access schedules.
- **SecureStat Intrusion:** Remotely arm and disarm, check current status and alerts, bypass and manage your alarm systems, regardless of location or platform.
- **SecureStat Monitoring:** View alarm account data and activity, put systems in/out of test mode and more for a single site or all of your sites.
- **SecureStat Alerts:** Monitor alarm or non-standard activity, generate reports and configure notifications.
- **SecureStat Video:** Ensure video system performance with continuous monitoring of video components for network connectivity, recording status, video loss, hard-drive operation and capacity, component temperature and more.
- **SecureStat Cloud Storage:** Your video can easily and seamlessly be saved to and retrieved from cloud storage exclusively or in combination with local IP storage, with live view capabilities.
- **SecureStat Fire:** Instantly view the number of fire alarms and trouble conditions that have been recorded over the last 24 hours for any site in your network.
- **SecureStat Account Management:** Reference site maps, account detail, audit information and receive relevant news.
- **SecureStat Service:** Initiate and track maintenance service requests.
